AND HARNESS REPAIRS

## Children Stay

### On This Farm

Because a septic tank and farm water system have made living on the "home place" just as attractive as the city.

Mother and the girls appreciate the snow white kitchen sink and modern water tubs.

The boys and hands keep busy on jobs more profitable than working in a pump house. During dry seasons there is plenty of water for garden and yard.

Let us tell you how your home can have "city comfort"

## Claresholm Local News

A. Brooker spent a few days in  
Calgary this week.

Mrs. Taylor R.N., of the hos-  
pital, spent a few days in Calgary  
this week.

Olaf Berg moved to Nanton  
district this week, where he will  
engage in farming.

Jack Peterson will leave on  
Saturday to visit relatives in Eng-  
land and Scotland.

Bob Glasgow was seen trying  
out his skis after the heavy  
snowfall this week.

Miss Annie Halaas left for Los  
Angeles last week, where she will  
visit some of her relatives and  
friends.

The Catholic Women's League  
are holding St. Patrick's tea on  
Saturday, March 19. Watch for  
further announcement.

The ladies of Claresholm U. F.  
W. A. No. 204 are holding a tea  
and sale of aprons on Saturday,  
March 12th, at the rest room.

Miss R. Hudson from Calgary  
was in town for the week-end  
dance this week, staying at the  
home of Mr. and Mrs. J. A. Har-  
rison.

Mrs. Barlow and the pupils of  
St. John's Bible class desire to  
thank all those who so generously  
helped them to make their tea  
a success.

Hoot Gibson in "The Phantom  
Bullet" at the Rex theatre Friday  
and Saturday nights this week.  
Adapted from the story "Clock of  
the Triangle" by Oscar Reisch.

Mrs. A. D. Clarke of Calgary,  
daughter of Mr. and Mrs. J. A.  
Harrison, was the guest of Mrs.  
T. J. Summerfield on Monday and  
Tuesday last. She spent an en-  
joyable evening at the Elks' Val-  
entine dance.

Mr. George Woods, of the  
Woods' Christian Home for Chil-  
dren, acknowledges with thank-  
s the receipt of eighty-four dollars  
and seventy-five cents (\$84.75)  
collected by Miss Nettie Thomp-  
son and Mrs. Humphrey.

Corless R. Shearer has purchas-  
ed Dr. McMillan's half section  
east on the Starline. It's sad to  
think of poor Corless out there all  
alone, when he has always been  
used to his mother's good cook-  
ing. Don't worry, Corless isn't.

Wednesday night, following  
the business session, the Elks en-  
joyed a fine program of vocal and  
instrumental music, etc., furnis-  
hed by some of their talented mem-  
bers, the social portion of the  
meeting ending with a tasty  
lunch.

The weather has been decid-  
edly wintry for most of the past  
week, the mercury marking sub-  
zero on several days. The biting  
winds have been worse than the  
low temperatures. Thursday morn-  
ing was the coldest, when the  
thermometer marked 35 below  
during the early hours. About 7  
inches of snow has fallen during  
the week.

In connection with the entertain-  
ment to be put on in the  
L. O. O. F. Hall on Tuesday last  
March, two comedies are being  
prepared and will be presented by  
the Footlights Dramatic Society  
of Claresholm, entitled "Fashion-  
able Intelligence" and "The Bur-  
glar and the Judge." There will  
also be songs by local artists.

The Claresholm community  
horse sale will be held at the  
Vanhorn barn on Monday, Feb-  
ruary 28, starting at 1 o'clock.  
70 head of well broken farm  
horses will be sold by auction.  
Also eight good young mules.  
All who have horses listed are re-  
commended to have their horses in  
the Vanhorn feed barn by 3  
o'clock on Saturday the 26th, in  
order to get the horses properly  
arranged for the sale. Reduced  
bargain rates. Good men in charge.  
A. E. Runions, Auctioneer.

## RINGRORE AGAIN CHOSEN MAYOR OF CLARESHOLM

The election last Monday pro-  
duced the following results:

For Mayor:  
Geo. W. Ringrore 135 (elected).  
John Walls 120.

Spilled ballots 3.

For Councillors:  
Stanley Wyatt 135 (elected).  
Norman MacKenzie 105.

Martin Armstrong 111.

Geo. Maxwell 128 (elected).

J. M. Soly 100.

J. W. Morrow 138 (elected).

Spilled ballots 19.

For School Trustees:  
H. A. Fairbairn 125.

E. H. Mack 205 (elected).

C. Miller 134 (elected).

Spilled ballots 35.

Messrs. Stanley Ferguson and  
C. E. Moore acted as agents for  
Mayor Ringrore, and Messrs. W.  
C. Miller and Ed. Gray as agents  
for Mr. Walls.

The first meeting of the coun-  
cil will be held on the first Thurs-  
day in March.

## ATTENDANCE AT ELKS DANCE SMASHES RECORD

The Elks as usual left all com-  
petition far behind when they put  
on their Valentine dance on Mon-  
day evening last. An immense  
crowd attended and danced until  
nearly 4 a.m. The hall had the  
finest decorations ever seen in  
Claresholm.

By far the largest crowd of the  
year attended the affair and en-  
joyed itself hugely, even though  
the floor was almost too crowded  
to dance on. A free lemonade  
stand conducted by Messrs. Har-  
vey and Cove was very much in  
favor with the dancers. The aug-  
mented Blackbirds, who besides  
their regular personnel, had the  
assistance of Messrs. Colman  
and Glasgow on the saxophone  
and Mr. Shapter on the banjo,  
were encored time and again.

The prizes offered were won by  
the following: Mrs. Sid Lewis,  
ladies' prize. Clarence Schu-  
macher and Julius Edlund, gents'  
prizes.

In addition to the local crowd,  
a goodly number of Stavely Elks  
were in attendance, and a few  
from other points.

The committees all did their  
work well, and the Elks are to  
be congratulated on putting over  
one of the most enjoyable dances  
ever held in Claresholm.

## GIVES ENJOYABLE PARTY

Some 50 guests of Miss Nancy  
Mackintosh spent an enjoyable  
time at a Valentine party in the  
Parish Hall last Friday evening.  
Miss Hazel Hutton assisted the  
hostess.

The hall was prettily decorated  
with red and white streamers.  
There were two tables of bridge  
and dancing was enjoyed till 2 a.  
m. Lunches were served in red  
decorated boxes in the shape of a  
heart.

The invitations for the occasion  
were in the form of red hearts.  
Music for the dancing was sup-  
plied by different guests.

## BAD MOTOR ACCIDENT

When J. L. Salmon accompan-  
ied by Mrs. Salmon was driving  
Mr. and Mrs. Gordon Ferguson  
home to Stavely from church here  
on Sunday evening, the Mc-  
Laughlin car they were in turned  
tumble on the slippery road, a stretch  
of road just north of town, land-  
ing on its top.

Mrs. Ferguson was taken to  
hospital, while Mr. and Mrs. Sal-  
mon were taken home with a broken  
wrist. Mr. Salmon escaped with  
slight bruises, while Mr. Fergu-  
son got a severe shock. It is a  
fact that the car landed on its top,  
and that the top was able to bear  
the weight, undoubtedly kept it  
from having graver conse-  
quences.

## COUGHS THAT PERSIST

You cannot afford to let an ordinary cough  
hang on and when they become deep-seated prompt  
treatment is necessary.

## NYAL CREOPHOS

will relieve the most stubborn coughs and build up  
strength to enable the system to throw off disease.

## Far-Flung British Empire In Area and Extent Is Something At Which To Marvel

Commenting on the recent Imperial Conference and its accomplishments, a contributor to the World Magazine remarks that without the self-governing Dominions and India, Great Britain and her dependencies would constitute quite a respectable Empire. That, of course, is true enough, but it would be an Empire of the older type, not a Commonwealth of free, self-governing states bound together by community of sentiment and interest and acting together for the common good. In other words, a great experiment of incalculable value to the world, would be nullified were disruption to come. But apart from this side of the question, most people have only a vague idea of the vast extent of the territories that the British Empire has under the control of the monarch and to keep the peace within their confines. World Wide, indeed, applied the powers of the imagination to the British Empire in its supposed restricted form. In Asia the Dominions have far exceed the Mother Country and its dependencies, even though the Sudan alone, with its millions of square miles, more than equals a quarter of the continent of Australia, and more than the whole of India. As World Wide says, "It is in number and reach that these dependencies shine as a veritable galaxy. Its reach is every ocean, every continent, its latitudes are at least touched, save that the North American continent, the Newfoundland and her stretch of Labrador is eliminated."

In Europe there are Northern Ireland, the Isle of Man, the Channel Islands, Gibraltar, Malta and Cyprus. In Central and South America there are the British West Indies, Bermuda, Falkland Islands, British Guiana, British Honduras.

In Africa, in continental possessions and islands under direct control of the British government there are Swaziland, Bechuanaland, Basutoland, Southern Rhodesia, Northern Rhodesia, Nyasaland, Uganda, Kenya, Zanzibar, Somaliland, Sudan, St. Helena, Ascension, Nigeria, Gold Coast, Sierra Leone, Cameroons, Mauritania, Seychelles.

In Asia, other than India, there are Ceylon, Aden, Port Blair, the Chagos Settlements, Federated Malay States, Unfederated Malay States, Brunei, British North Borneo, Sarawak, Hong Kong, Weihaiwei.

In Oceania, Papua, Fiji, Gilbert and Ellice Islands, Solomon Islands, and Tonga Islands.

To complete the list outside the Dominions and India there are the "Dependencies" under the British crown. They are the British Cameroons, Iraq, Palestine, Tanganyika and British Somaliland.

What a vast structure the British Empire is, can be gathered from this stocktaking and when the Dominions and India are considered, the picture becomes even more imposing still. Says the *World Magazine*: "The British Empire is required to hold this massive structure together with its vast resources, and the points was provided in what was effected at the Imperial Conference in its achievement in regard to the standing status. The stocktaking shows to our Empire as it is, something at which to marvel."

### Improvements In Fruits

Determining the Kind Most Suitable for Growth in Each Particular District

There are no more valuable experiments being carried on at the Dominion Experimental Farms and stations than those concerning fruit. Not alone are efforts directed to the improvement of varieties, but also to the ascertainment of the kind most suitable for growth in each particular district. Apples being the greatest staple of the country naturally receive special attention and some valuable varieties have been developed or bettered by cultivation. Special efforts are being made to obtain heavier and improved winter stores, around no more than three hundred of the longer-keeping varieties now being under test. Peas are receiving similar attention and particularly with a view to securing better blight-resistant varieties.

Hardy cherries are being looked for and the hybrids between the native American species and European varieties have produced useful sorts for Eastern Canada. A spinous rose-hedge, three first prize, one second, prize, and one fourth prize, is being experimented with to encourage growth of their wider growth.

Investigations in regard to runner formation and fertilizing of the strawberry have shown that the earlier the runners root the larger will be the berries and that when straw mulch is used as a fertilizer the best results are obtained when it is applied during the month of September.

"Ideal Fashions" is a new fashion book published by the Dominion Experimental Farms, showing the latest in dressmaking and tailoring.

Charmingly simple is this attractive daytime dress with its slendering lines. The bodice has a deep V-neck and new waist. While the long skirted skirt is trimmed with a wide band of lace and the back is slightly flared, the dress is a very attractive and very attractive.

Every woman's desire is to achieve that smart different appearance which comes from the dressmaker's hand. The dress is a very attractive and very attractive.

One's grace, we note, depends on one's pose and behavior. In olden times that event may be regarded as a promoter of grace.

A damp cloth dipped in lemon juice will remove tea and coffee stains from china cups.

### Canadian Bacon Wins Prestige

Is Fast Taking a Prominent Place on the British Market

Canadian bred bacon is fast taking a prominent place on the British market. J. G. Robertson, secretary of the Saskatchewan Swine Breeders' Association reported at the livestock association's convention, Moose Jaw, Mr. Robertson pointed out that since the grading of hogs came into effect in November, 1922, greater progress had been made in the West than in any other part of the country. The encouraging figures of export trade was the prestige Canadian bacon is winning in competition with Danish.

The spread in price between Danish and Canadian bacon has declined from 25 shillings and eight pence in 1921 to four shillings in 1922, while in 1921 the average price of Danish bacon was 12 shillings and eight pence, while Canadian bacon was 12 shillings and eight pence.

Mr. Robertson stated that only 2.5 per cent of hogs marketed in Winnipeg during 1921 graded select, while the percentage now is 3.5 in 1922 and approximately nine per cent in 1923. Apart from entering directly into the quality of the hogs, Canada's bacon exports to Great Britain had steadily increased since hog grading started in 1922.

A small exhibit of Tawmorth hogs was entered at the Toronto Royal and Canadian winter sales by E. E. Morrison of Yorkville. Mr. Morrison was successful in winning reserve championship honor, three first prize, one second, prize, and one fourth prize, making a total of ten prizes. This very creditable showing should encourage this association to send a larger exhibit to eastern fairs in 1927.

The membership of this association now 215, has shown a substantial increase during the last three years having this year for the first time exceeded the 200 mark. The association is in a satisfactory financial condition, having increased its bank balance at the end of 1926 to \$1924.42 as compared with \$1219.49 at the end of 1925.

"Saskatchewan's swine population—259,601 head—is the fourth largest in the Dominion," stated Mr. Robertson. While eight of the nine provinces showed heavy decreases in 1925—Saskatchewan's decline of 2,700 head, being almost unmarked improvement was recorded in 1925 when six provinces registered increases. Saskatchewan showed an increase of 11,227 hogs during the year.

"With the average price for select hogs on the Winnipeg stock yards showing an increase of \$1.17 per 100 pounds in 1926 as compared with the preceding year, the swine industry completed a very successful year. It is interesting to note that the average price for hogs during the last two years was from 20 to 25 per cent above pre-war prices. Hogs can be raised at a profit under these conditions."

In the slave markets of the olden days women who could blush prettily always brought a higher price than their less accomplished sisters.

Many a fool has drawn a golden prize when he has drawn only a blank.

### Honey Is Valuable Food

Various Ways in Which It May be Used

Honey sweetens life in many ways. This is apparent when we see the various uses to which it is put. For nearly it was used mainly as a spread on bread, but today there are a great number of other ways of using it to very good purpose. Though the best way to serve honey is in its natural or raw form in desserts, as a sweetener, it is used to a large extent in confectionery both in the baking of cakes and making of fudge, which in its purity the property of keeping fresh for a long time—this is a point which all food lovers should keep in mind.

Besides this it is used in the making of candies, such as a centre which is chocolate coated and as an ingredient in the many other kinds of sweets, for which recipes are to be found in all good cook books.

A very appealing new spread is now manufactured by incorporating honey with peanut butter to make what is called "Honey-peanut butter." Apart from entering directly into the use, it is used to make most excellent vinegar, said by many to be the best of the kind.

The motorist too may receive his temper by the use of it as an anti-freeze. It has been found that equal parts of honey and water, and about one part of glycerine, will make a mixture that has proved very satisfactory to those who have taken the proper precautions to see that the proper proportions are used, for places where water cannot pass through the engine and the engine will.

We can realize the value of honey as a natural food when we see some of the large breakfast food manufacturers now advertising on all packages of cereals put out by them the use of it as a sweetener. A. H. W. Birch, Central Experimental Farm, Ottawa—Experimental Farm Note.

### Is World Drifting Toward War

Noted British Economist Offers Solution for Impending Trouble

Abandonment of selfish nationalism and a return to a search for the common good was the solution laid out in an address in Montreal recently by Sir George Paish, noted British economist, to the question "Can Civilization be Effectively Destroyed?" Sir George's greatest hope was to be found in the League of Nations, to which he believed every nation in the world would eventually belong. Before that, however, he felt that the majority of the nations would be the strength of their united purpose bring peace to a war-weary world.

He declared the world was drifting toward a conflict more devastating than that which started in 1914. To avoid it, would require on the part of all nations, sympathy and understanding of their mutual aims and aspirations, qualities which they had never before brought to the solution of their problems.

Sir George's greatest hope was to be found in the League of Nations, to which he believed every nation in the world would eventually belong. Before that, however, he felt that the majority of the nations would be the strength of their united purpose bring peace to a war-weary world.

"It is, in my judgment, impossible for any nation to demand payment of war debts," he said.

## Canada Achieves International Renown For High Quality Of Its Vegetable Products

### Value of Good Dairy Cow

Record Should be Carefully Studied Before Making Purchase

How much can a farmer afford to pay for a good dairy cow, and what conditions should be placed on his good purchase? This question is asked in the latest bulletin of the Dominion Poultry Association and an attempt is made to answer it on the basis of figures obtained from the records of the Iowa Cow Testing association for a full year completed last year.

A summary and average of the 2,650 cows of which complete year's records were kept showed that the profits after feed and costs, varied from \$17 to \$131. The cows which produced an average of only 100 lbs. butterfat in a year required only \$55.47 worth of feed, while those producing an average of 200 lbs. butterfat had a feed bill of \$82.71. In spite of the higher feed cost, the 200 lb. producers made a profit of over \$50.00, while the 100 lb. producers returned only \$17.22.

From these results it may be concluded that, in some instances, \$200 may not be enough for a good dairy cow, and that even \$25 might be too much for another. The good cow may return twice as much for every dollar of feed she eats as will the poor cow. When the whole lifetime production of a cow is considered, one good cow, well fed, may be worth a whole herd of inferior producers. The lessons from such records should be carefully studied by every dairy farmer who wishes to make a success of his business.

Nearest to Europe  
Newfoundland, the oldest British colony, is the part of North America nearest to Europe. Cape Race, the southernmost point of Newfoundland, is less than 1,700 miles from Cape Clear, Ireland. At the north, Newfoundland is separated from Labrador by the Strait of Belle Isle, which is only 12 miles wide. Newfoundland has an area of 47,724 square miles.

Winner Naturally Dashed  
Two Englishmen were watching a fight when suddenly a native stepped out from the jungle, running for his life and barely parried by a gigantic leopard.

"He's making a race for it," remarked one of the Englishmen. "I've seen him before, but I never saw him like this." The winner, came the dry retort, "is spotted!"

A cold snap is a soft snap—for the coal dealer.

It is easier to stand prosperity than it is to get a chance to try.

### Justified publicity was given to the fact that at the American Vegetable Growers' Annual Show held recently at Cleveland, Ohio, in which eleven states competed, the Canadian champion of the North American continent was won by a market gardener from Manitoba, Kluge de Jong, who came to the province from Holland some twenty years ago. At the same time, in the same show, competition, the North American very championship was awarded James Little, of St. Catharines, Ontario. Two most outstanding awards are, undoubtedly, clearly indicative of the Dominion's ability to produce superior vegetables.

Certain sections of Canada have achieved an international renown for their vegetable products. The Maritime Provinces produce, for instance, the finest tomato at over the ocean continent and travels in some volume to Cuba, Bermuda, British Columbia, and other countries. On the other side of the Dominion the Pacific coast is free of British Columbia is credited with the reputation and seems destined to develop as a wide market. Recently an order for one hundred cases of the finest produce was received by the Provincial Growers' Association. The same province is becoming well known for its produce, with about 1,255 acres devoted to this crop, which 1,000 acres are in the Okanagan Valley. Practically every vegetable raised in British Columbia is exported to the United States, Australia and New Zealand.

The Dominion's potato crop of 1926 is estimated to be 4,320,000 cwt., as compared with 4,273,300 cwt. in 1925, contributed as follows: Prince Edward Island, 1,000,000 cwt.; Nova Scotia, 5,532,000; New Brunswick, 1,211,000; Quebec, 13,009,000; Ontario, 1,530,000; Manitoba, 1,000,000; Saskatchewan, 2,015,000; Alberta, 2,761,000; and British Columbia, 1,029,000 cwt. The onion crop of 1926 is estimated to be 1,000,000 cwt., and that of British Columbia, 829 cwt., 110 cars of the latter being available for export.

Largest Yielding Hay Crop  
Canadian Oregon Alfalfa Seed Better Than the Imported Article

Alfalfa is the largest yielding hay crop grown on the Central Canadian Farm at Ottawa and points out the Minister of Agriculture in his latest report. It is easily grown on soils suited to it, demands little care, and is the most important fact that Canadian alfalfa seed gives very much better results than those obtained from imported seed.

Still dealing with the work of the Field Husbandry division at the farm, the minister says that alfalfa seed, with corn for silage it has been found that on sandy soil corn gives a yield of actual dry matter slightly larger than alfalfa, but that because it is easier to handle and makes slightly superior silage, corn is to be used in preference to alfalfa. It will grow satisfactorily. However, on heavy clay soils alfalfa yields less than corn and for that reason presents some advantages on such soil.

Prescription for Success  
Dr. William Osler's prescription for success in doing the daily job will appeal to many harassed souls: "Banish the future, live only for the hour and its allotted work. Think not of the amount to be accomplished, the difficulties to be overcome, or the odds to be won; but see earnestly at the little task at your elbow, letting that be sufficient for the day."

An Underground Wonder  
At the new Tube station now under construction beneath Piccadilly Circus, London, are a number of tunnels that will be devoted to the banking of the Tube. This is necessitating the removal of about 10,000 tons of London clay. When completed the station will be able to handle 10,000 passengers annually.

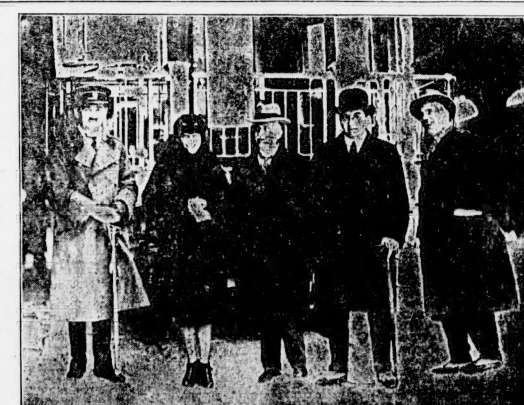

Governor of Prison—No. 33, his Majesty has been pleased to commute your sentence to penal servitude for life.

Condemned Man—Well, sir, they say no more is good news, and I'm lashed if I lie!

Reformer—Young man, do you know of the pitfalls of the wicked city?

Harold—Yes sir, I feel down a man-hole once.

Only the man whose money burns holes in his pocket has money to burn.
